Contract Geologist - 10053

ABOUT THE COMPANY

Sabina Gold & Silver Corp. is a well-financed Canadian precious metals company on track to become a mid-tier gold producer. The Company has a portfolio of properties in Canada at different stages of development. Our flagship project, the Back River Gold Project, is located in the western Kitikmeot Region of Nunavut. Through our Nunavut assets, Sabina is evolving from a successful exploration company to a developer. Sabina is listed on the Toronto Stock Exchange ("SBB").

ABOUT THE POSITION

Working in a remote camp setting with limited access to resources, the Contract Geologist is responsible for supporting geological and geophysical programs in a safe and efficient manner. Duties will include core logging, underground/exploration drilling, geochemical and metallurgical sampling, geotechnical logging, reporting and other duties as assigned. The Contract Geologist will report work completed to the Supervisor or designate. We are seeking one (1) individual for a temporary two-month opportunity with possibility of extension, starting in October 2022.

PRIMARY RESPONSIBILITIES

Reporting to the Manager, Technical Services, duties will include (but are not limited to):

- Logging and sampling of core, date entry from core logging;
- Collection and interpretation of geological data from exploration and underground programs, including diamond drilling, field mapping, surface sampling, and re-logging;
- Occasional core cutting and preparation of sample shipments as required;
- Working both in a team and independently to maintain a highly organized core shack;
- Reporting on work completed to Supervisor;
- Support geological and geophysical programs in a safe and efficient manner;
- Participate in daily toolbox meetings to promote compliance to Sabina's safety policies and procedures; and
- Ensure work area is free of any hazards (ex. tripping hazards).

DESIRED QUALIFICATIONS

The successful candidate will have prior experience working in a remote camp setting with limited access to resources. Additionally, they will have:

- Two (2) to five (5) years' experience drill core logging and drill contractor management;
- Experience in Banded Iron Formation (BIF) gold is considered an asset;
- Familiarity with DH Logger considered an asset;
- Bachelor of Science degree in Geology or related discipline (required);
- Physically able to lift a minimum of 50 lbs., walk and stand for long periods of time and perform physical labour; and
- WHIMS Certification and/or Level 1 First Aid considered an asset.

Contract Geologist - 10053

COMPENSATION AND BENEFITS

For informational purposes, the blended rate of pay for this role is \$55.00 – 63.00 (based on prior experience) for 2184 scheduled hours in a work year. Competitive travel compensation will be discussed with the successful candidate.

APPLICATION AND CONTACT INFORMATION

To be considered for this opportunity, please email your resume to employment@sabinagoldsilver.com using the reference number 10053 in the subject line.

Kitikmeot Inuit, Nunavut Inuit and Residents receive priority hiring consideration, if one these categories applies, please state it after the reference number in the subject line.

We thank all for their interest but are only considering applicants with working rights in Canada.

We will retain application material on file for future vacancies (openings within 6-12 months) for consideration; however, you are encouraged to apply to any opening you may be suited for. If selected to move forward a member of our team will be in touch.

CLOSING DATE

This posting will remain open until 12:00AM MST September 23, 2022 unless a suitable candidate is not found; however, we encourage interested applicants to submit their resumes ASAP in order to be considered.
