UG Heavy Equipment Technician – 10010

ABOUT THE COMPANY

Sabina Gold & Silver Corp. is a well-financed Canadian precious metals company on track to become a mid-tier gold producer. The Company has a portfolio of properties in Canada at different stages of development. Our flagship project, the Back River Gold Project, is located in the western Kitikmeot Region of Nunavut. Through our Nunavut assets, Sabina is evolving from a successful exploration company to a developer. Sabina is listed on the Toronto Stock Exchange ("SBB").

ABOUT THE POSITION

Reporting to the Maintenance Superintendent, the Underground (UG) Heavy Equipment Technician will diagnose, repair, adjust, overhaul, maintain, test, and perform planned and unplanned maintenance on underground Cat or Sandvik heavy-duty equipment to ensure safe & efficient use. This individual works on a rotational basis (3x3) based at the Back River Project where repairs may be required to occur in a mobile equipment shop, a temporary staging location or outside in inclement conditions where the worker will be subjected to the elements.

PRIMARY RESPONSIBILITIES

Reporting to the Superintendent, Maintenance, duties will include, but are not limited to:

- Monitor equipment conditions to ensure safe & efficient use and identify any areas in need of repair or improvement. Equipment includes (but not limited to): Sandvik tunneling jumbos, Sandvik scooptrams, Wildon pumps, scissordecks, 200-349 track hoes, Cat 775 haul trucks, Maclean bolters, jackleg drills, stoper drills, generators, Kubota RTVs, and heavy or light vehicle support equipment;
- Conduct diagnostic procedures on equipment such as troubleshooting, repairing, and performing scheduled and unscheduled maintenance as required;
- Perform pre-inspections of equipment and test repaired equipment for proper performance and ensure that work meets or exceeds manufacturers' specifications;
- Communicate and work with supervisors and planners/site teams to complete planned & unplanned maintenance;
- Document work & repairs completed and report to supervisor any deficiencies;
- Fabrication alternative componentry for equipment which will effectively and safely substitute for OEM parts; and
- Participate in safety toolbox talks and follow all site policies & procedures to ensure compliance.

DESIRED QUALIFICATIONS

The successful candidate will have prior experience working in a remote camp. Additionally, they will have:

- Three (3) years of post-qualification industry experience, preferably in an isolated remote setting with limited access to parts and resources with prior underground mining experience required;
- Interprovincial Red Seal Heavy Duty Equipment Technician or Nunavut Heavy Equipment Technician CoQ required. (*Extensive industry experience may be considered for a UG Mechanic position*);
- Experience troubleshooting, repairing, and performing maintenance required on the following underground equipment: Sandvik tunneling jumbos, Sandvik scooptrams, Wildon pumps, Cat haul trucks, Maclean bolters, jackleg drills, stoper drills, and generators; and
- Valid Drivers License required.
