UGD Miner - 10071

ABOUT THE COMPANY

Sabina Gold & Silver Corp. is a well-financed Canadian precious metals company on track to become a mid-tier gold producer. The Company has a portfolio of properties in Canada at different stages of development. Our flagship project, the Back River Gold Project, is located in the western Kitikmeot Region of Nunavut. Through our Nunavut assets, Sabina is evolving from a successful exploration company to a developer. Sabina is listed on the Toronto Stock Exchange ("SBB").

ABOUT THE POSITION

Reporting to the Underground Development (UGD) Superintendent, the Underground (UGD) Miner is responsible for the safe and efficient advancement of the underground mine face using conventional mining techniques. Working in a remote camp setting the UGD Miner works on 12-hour shifts while rotating between day and night shifts and participates in developmental and production tasks, including but not limited to lateral and vertical advance, mechanical installations, maintenance of air/water quality, ventilation, ground support, and other general mine labourer duties as required.

PRIMARY RESPONSIBILITIES

Reporting to the Superintendent, Underground, duties will include (but are not limited to):

- Participate in other areas of underground development as required, including the safe and efficient operation of underground mining equipment inclusive of, but not limited to: LHD (Scooptram), bolter, jumbo, haul truck, raise bore, jackleg, stoper, or scissor deck, to build, repair, and maintain underground passageways;
- The safe and efficient advancement of the mining face using conventional mining techniques and bolting/screening lateral development tunnels to reach predetermined daily, weekly, and monthly underground targets;
- Construct, repair, and maintain wood or metal supports and structures such as bulkheads, ventilation doors, platforms, drift doors and chutes using construction and mining related tools;
- Utilize best practice for mine advance such as mechanical installations (pumps and piping), scaling loose rock from walls and roof, drilling and installing rock bolts, extending, maintaining, and installing air and water pipes, repairing and extending ventilation duct and equipment, operating ore/waste loading machinery, inspecting mine tunnels, and constructing timber supports and cribbing if required;
- Set up and operate drills and drilling machines to produce a designated pattern of blasting holes to load explosives and detonate explosives from blasting patterns to produce designed tunnels/raises with acceptable fragmentation;
- Assess ground conditions at the face and assist with the installation of ground control according to preset plans;
- Performing pre and post operational inspections of equipment to ensure the safe operation, report all deficiencies to supervisor; and
- Attend safety toolbox meetings to promote compliance with Sabina's safety policies and procedures and other general mine labourer duties as assigned by the supervisor.

DESIRED QUALIFICATIONS

The successful candidate will have prior experience working in a remote camp setting with limited access to resources. Additionally, they will have:

- Five (5) years' experience of in underground mining construction experience, preferably in a remote mining setting with limited access to resources combined with three (3) years' of experience in conventional underground drill and blast development;
- Experience in Alimak/raise climber mining role or related required;
