Underground Surveyor - 10001

ABOUT THE COMPANY

"Sabina Gold & Silver Corp. is a well-financed Canadian precious metals company on track to become a mid-tier gold producer. The Company has a portfolio of properties in Canada at different stages of development. Our flagship project, the Back River Gold Project, is located in the western Kitikmeot Region of Nunavut. Through our Nunavut assets, Sabina is evolving from a successful exploration company to a developer. Sabina is listed on the Toronto Stock Exchange ("SBB")."

ABOUT THE POSITION

The Underground Surveyor is responsible for prioritizing and coordinating survey functions of the Mine Operations teams, Mine Developmental Projects, and Environmental programs in an open-pit and underground environment. Reporting to the Lead Surveyor, this individual works on a rotational basis (3X3) in a remote camp setting using differing surveying/mining software's to ensure the smooth operations of survey activities across site.

PRIMARY RESPONSIBILITIES

Reporting to the Lead Surveyor, duties will include, but are not limited to:

- Completing daily surveying activities such as grade & survey control, mark-ups, water elevation surveys, field survey, drill pattern stakeout, and clean up requirements;
- Visits to underground sites regularly to assess conditions, gather data and make improvement recommendation;
- Surveying mining areas (underground and surface) to monitor advances and to calculate month end volumes;
- Prioritize, communicate, and coordinate survey functions of mine operations, mine development projects, and environmental programs. Ensure accuracy of mine survey record maps, plans, plots, profiles and reports;
- Survey surface stockpiles and other infrastructure related to underground mining activities as required;
- Work with Jumbo Drill operators to identify changes to drill plans as required;
- QA/QC of mine ventilation and readings;
- Participate in daily toolbox safety meetings to promote and comply with site safety policies & procedures; and
- Other duties as assigned by the supervisor.

DESIRED QUALIFICATIONS

- One to three (1 - 3) years' experience in Underground Surveying on remote sites is required;
- Bachelor of Mining Engineering Technology (B Tech) or related required;
- Proficient in surveying/mining related software (MS Office, Vulcan, Deswik, AutoCAD) preferred;
- Research, procurement and implementation of continuous improvement projects to increase efficiency of underground operation;
- Experience in surface mine and Alimak Raise survey strongly recommended; and
- Experience using Sandvik ISure Drill planning tools is considered an asset (training can be provided).
