## Welder - 10054

### ABOUT THE COMPANY

*Sabina Gold & Silver Corp. is a well-financed Canadian precious metals company on track to become a mid-tier gold producer. The Company has a portfolio of properties in Canada at different stages of development. Our flagship project, the Back River Gold Project, is located in the western Kitikmeot Region of Nunavut. Through our Nunavut assets, Sabina is evolving from a successful exploration company to a developer. Sabina is listed on the Toronto Stock Exchange ("SBB").*

### ABOUT THE POSITION

The Welder's main responsibilities are to cut and join metals and other materials for repair of heavy mining equipment inclusive of haul trucks, skid steers, graders, excavators, and articulated rock trucks. Working in a remote camp setting on a rotational basis (3x3), the Welder is responsible for the repair, replacement, and rebuilding of mechanical structures. The Welder must be competent in using potentially dangerous equipment and show demonstrated proficiency in adherence to Sabina's safety policies and procedures. We are seeking two (2) individuals for a Fly In, Fly Out opportunity.

### PRIMARY RESPONSIBILITIES

Reporting to the Superintendent, Maintenance or Designate, duties will include (but are not limited to):

- Review equipment specifications and drawings and take measurements to plan layout and procedures for welding activities;
- Determine the appropriate welding equipment and methods based on the assessed requirements;
- Set components for welding according to specifications (e.g. cut material with powered saws to match measurements);
- Operate various industrial tools to prepare parts for welding;
- Align components using calipers, rulers etc. and clamp pieces;
- Weld components using manual or semi-automatic welding equipment in various positions (vertical, horizontal or overhead);
- Control metal shaping machines such as brakes, shears and other metal straightening and bending machines;
- Test and inspect welded surfaces and structures to determine if there are flaws or signs of fatigue; and
- Maintain equipment to a condition that meets or exceeds specifications and that does not compromise safety.

### DESIRED QUALIFICATIONS

The successful candidate will have prior experience working in a remote camp setting with limited access to resources. Additionally, they will have:

- Two (2) years of post-trade certification experience, with extensive work on mining heavy equipment;
- Interprovincial Red seal trade designation in welding, or Intraprovincial Blue seal for Nunavut; and
- Prior experience working in remote locations with a limited supply chain, is preferred.

### COMPENSATION AND BENEFITS

For informational purposes, the blended rate of pay for this role is \$65.62 for 2184 scheduled hours in a work year. Competitive benefits and travel compensation will be discussed with the successful candidate.
